FREELANCE WEB DEVELOPMENT WORK

Cook's Radon, Alpharetta, GA   July 2022 — Present
Web Developer and Online Marketing Lead
- Designed and maintained new website using React, Next.js, and Tailwind CSS with interactive features:
  - → Customer capability to request estimates and schedule on-site appointments
  - → Integrated capabilities into Cook's Radon's existing internal workflow
- Administrated company's digital software suite, including Gmail and other Google Workspace services
- Managed digital advertising with separate campaigns driving both website visits and office calls
- Work with Google Ads representatives to maximize lead generation from the digital advertising budget

Pig-N-Chik BBQ, Atlanta, GA   August 2021 — Present
Web Developer and Digital Consultant
- Designed new restaurant website using React, Next.js, and Tailwind CSS:
  - → Improved website performance, accessibility, and SEO
  - → Results included nearly 2.5x boost in traffic over the first year and 5x increase in traffic over three years
- Collaborated with restaurant management and Clover to improve online ordering and rewards experiences
- Maintain and refresh website on ongoing basis, adding new content for seasonal offerings
- Partnered with restaurant's marketing firm to implement the back-end components of in-store promotions

SKILLS

Languages, Libraries, and Databases
- HTML, CSS, JavaScript, TypeScript, Java, and Bash/Shell Scripts
- React, Next.js, Tailwind CSS, Material UI, and Radix UI
- Redis, MongoDB, various SQL (e.g., MySQL, PostgreSQL, SQLite), various NoSQL (e.g., Firebase), and various ORMs (e.g., Prisma, Drizzle)

Environments and Tools
- Linux (and WSL), Docker, Vercel, Netlify, and various AWS instances (e.g., EC2, S3)
- Google Ads, Google Analytics, Google Tag Manager, Google Business, Google Maps (Places) API, Twilio (Verify/Text), and SendGrid
- Git, GitHub, Google Workspace (and Admin), Microsoft Office, Figma, and Adobe Creative Cloud

Relevant Personal Interests
- I continually work on personal side-projects, rapidly prototyping ideas into functional applications
- I stay up to date on emerging and disruptive technologies
- Despite my experience being in web technology, my interests and area of emphasis are in cybersecurity
- Disciplinary boundaries can be too rigid; I am ready to learn from and work with others in adjacent fields
